The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-6 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 1 defines in lines 6-8: "bores that run inside the bearing bush, and wherein throttles in the bores ensure an optimum hydrostatic bearing", and lines 11-13 define "the two or more bores are connected with a connection block, that the throttles are accommodated inside the connection block". The two limitations are inconsistent with respect to the location of the throttles. The throttles are not located in the bores of the bearing bush as stated in lines 6-8.

Additionally, there is no clear antecedent for "the two or more bores" in line 11.

With respect to claim 6, the limitation of "a bearing bush without a shoulder is used" is unclear. Is this an additional bearing bush to the one defined in claim 1, or is it the same?

Claims 1-6 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.

As allowable subject matter has been indicated, applicant's reply must either comply with all formal requirements or specifically traverse each requirement not complied with. See 37 CFR 1.111(b) and MPEP § 707.07(a).

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
